

More convenient access to your audio broadcasts means better attendee engagement.

Give Your Audience the Option to Connect Via Their Smart Device

Wi-Fi based Audio Broadcasting from Translators USA Gives Participants Control Over Their Audio

Your organization is bringing in representatives, delegates, employees, clients, or partners together for a major events, and you expect hundreds, even thousands, of attendees.

But your attendees speak a variety of languages. How can you share this important information with them in their native tongue?

The solution is exciting new Wi-Fi hotspot audio broadcasting technology, now available from Translators USA.

- 1) Our hotspot-based audio broadcasting technology allows the input of electronic audio from up to 56 sources (TVs, pre-recorded messages, microphones, etc.). Those signals are digitized for broadcast over Wi-Fi.
- 2) When visitors enter your facility or event, they download and install a free app from the Apple App Store or the Google Play Store.
- 3) Using that app, visitors select the channel of the particular audio they want to hear and listen in with their smartphone's earbuds.

End listener frustration with Wi-Fi based audio broadcasting at your next corporate event.

We facilitate better communication and listener satisfaction. Have an upcoming event? Get a free quote today at [Translators-USA.com/Start-Quote](https://www.translators-usa.com/start-quote).

The hotspot hearing solution available from Translators USA features:

- Configurable for 4-56 channels
- Unlimited listener capacity and unlimited coverage means you can deliver MP3-quality sound at even the largest venues
- Negligible signal latency (what you hear is synced with what you see!)
- Low drainage demand on smartphone batteries
- More convenient for event attendees or facility patrons
- Perceived as more hygienic because people are using their own devices and earphones

Best of all, your audience can finally hear what they want to hear, without disturbing anyone else!

Use the Hotspot for Promotional Messaging!

The hotspot solution available from Translators USA is easy to set up, after which it essentially runs itself (software is included that lets you create a portal for system management). But as a bonus, the device allows you to send PDFs (with active hyperlinks), coupons, surveys ... even scrolling text that appears at the bottom of your customers' smartphones. Think of the promotional possibilities!

The hotspot device is great for sports bars, transportation terminals, doctor's offices, service-center waiting rooms, amusement parks, museums, gyms ... and more. Now available from Translators USA, this is an excellent investment for attracting visitors to your venue and to keep them coming back!
